MEEETLY SCHEDULING PLATFORM

VERSION 2.4
Comprehensive Demo PDF

Enterprise Master Calendar, Real-Time Executive Scheduling & Client Portals

Date: September 21, 2026

Executive Overview: Meeetly is an automated, real-time executive scheduling and calendar synchronization platform designed for high-touch B2B interactions. The solution bridges client appointment requests directly with leadership (Managing Director / Executive Desk), featuring 3-step interactive booking, morning/afternoon slot capacity management, live status updates, and automated WhatsApp/Google Meet dispatching.

System Architecture & Core Modules

Module Name	Primary Workflow & Functional Description	Deliverables / State
1. Admin Command Center	Executive workspace providing daily capacity KPIs, live time tracking, attendee briefings, and 1-click approvals.	• Dynamic 'Good Morning, Sudhin' • Live capacity analytics • Zero-latency sync
2. Master Calendar	Central scheduling grid with morning/afternoon session breakdown, Booked vs Available slot differentiation.	• **AS (Available Slot)** badge • Google Maps & Meet routing • Real-time lock protection
3. Client Booking Portal	Streamlined 3-step scheduling wizard allowing clients to pick verified dates, select open slots, and state meeting purpose.	• Verified Client Access • Direct MD Dispatching • Instant Confirmation Modal
4. My Appointments Hub	Client status dashboard reflecting real-time MD review decisions (Confirmed, Pending, Rescheduled, Cancelled).	• Clean white cards • WhatsApp 1-click share • Google Calendar export
5. Smart Notification Engine	Bi-directional event dispatching with reactive unread count badges that reset automatically once opened.	• Zero ghost notification counts • Push, Email, and SMS logs • Dual-portal synchronization

Production Verification & Engineering Reliability

- **Production Build:** Vite client build completed with **0 errors** across 1,924 compiled modules.
- **Backend Health:** Node.js Express server + SQLite persistent storage active and healthy on Port 5000.
- **Design Standards:** 100% adherence to the vibrant orange (`#f97316`) and pure white (`text-white`) design palette.

ADMIN WORKSPACE & MASTER CALENDAR

Visual walkthrough of administrator scheduling controls and day agenda

Screen Exhibit 1: Executive Master Calendar & Agenda Inspector

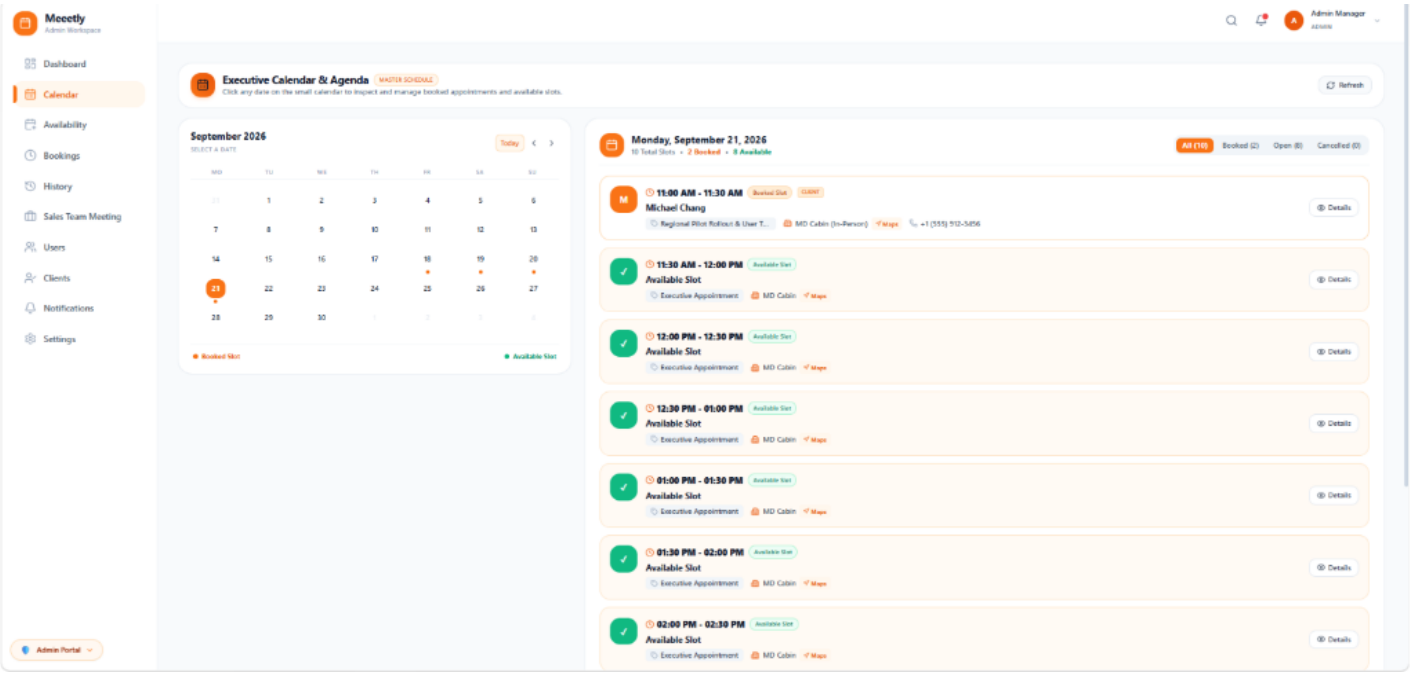

Figure 1.1: *Full Admin workspace displaying sidebar navigation, mini-calendar with dual-color dot indicators, and full bottom slot inspector.*

Screen Exhibit 2: Selected Day Capacity Briefing & Occupancy Bar

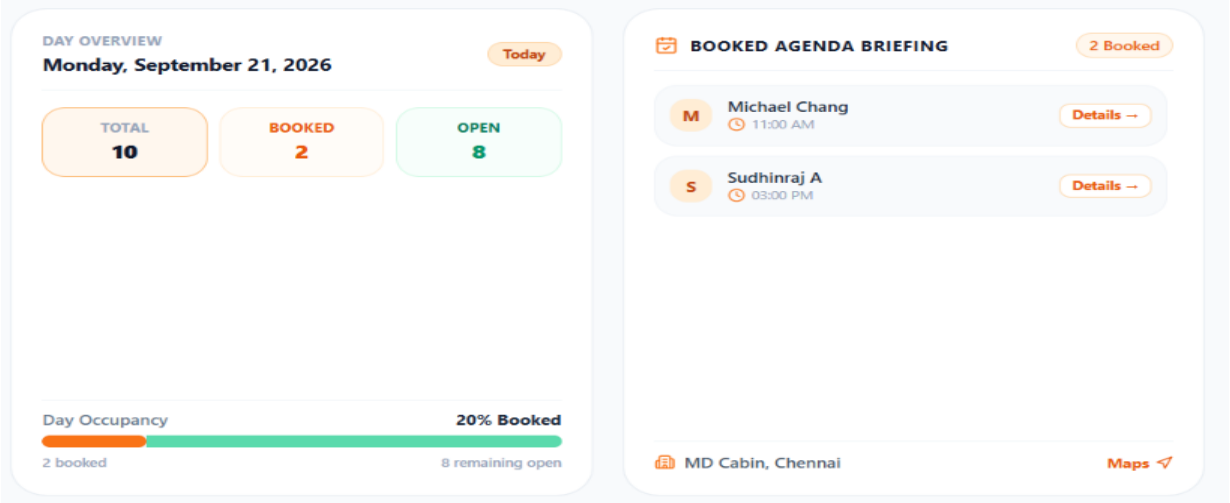

Figure 1.2: *Real-time capacity breakdown (Total Slots, Booked, Open) with interactive occupancy progress bar and attendee briefing.*

CLIENT SCHEDULING FUNNEL & APPOINTMENTS

Frictionless client booking flow, verified confirmations, and live status cards

Screen Exhibit 3: Client 'My Appointments' Cards (Clean White Standard)

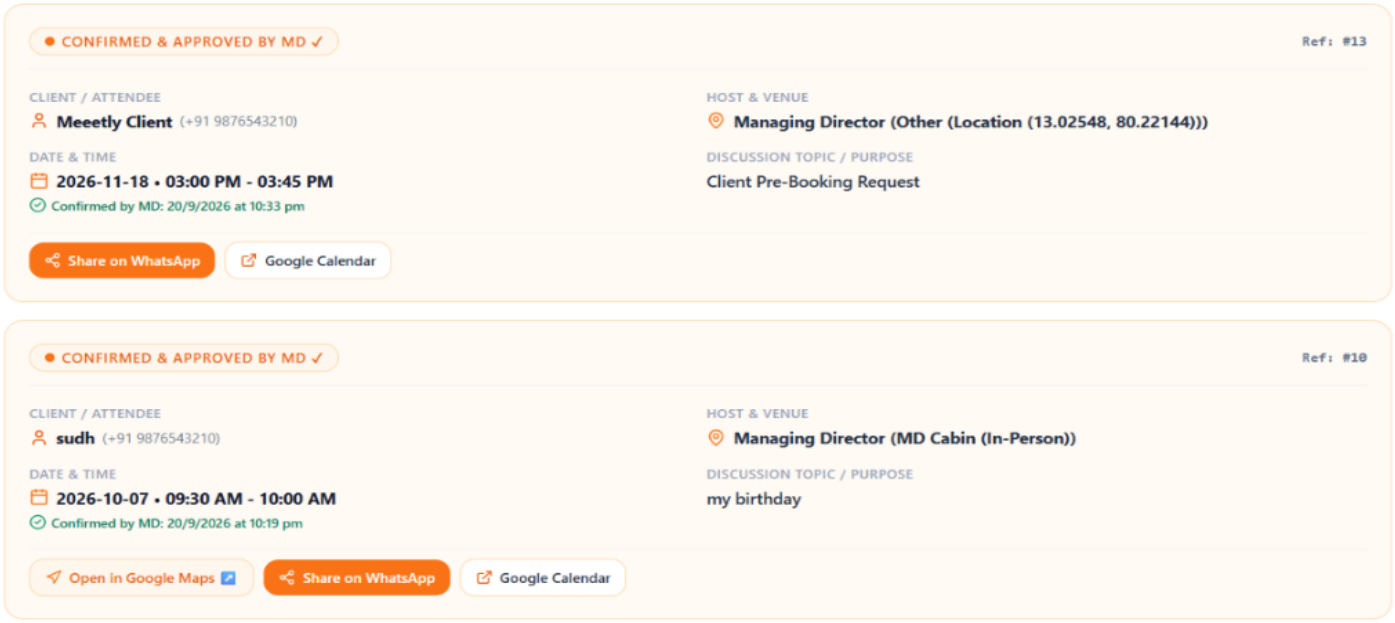

Figure 2.1: *My Appointments dashboard featuring clean white card backgrounds, confirmed approval badges ('CONFIRMED & APPROVED BY MD'), Google Maps venue links, and WhatsApp sharing.*

Screen Exhibit 4: Real-Time Appointment Dispatch & Confirmation Modal

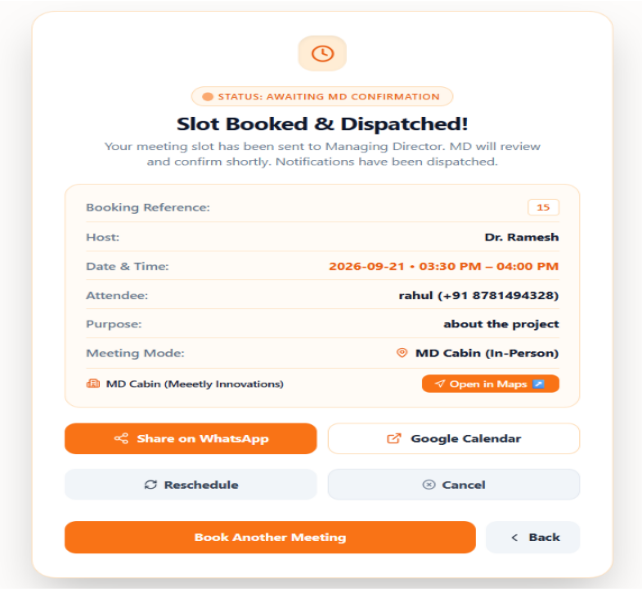

Figure 2.2: *Instant booking dispatch modal with reference ID, host details, meeting mode, and real-time notification dispatch confirmation.*

KEY COMPONENT EXHIBITS & RECENT UPGRADES

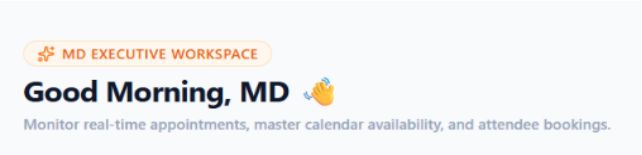

Detailed visual inspection of refined UI components and system upgrades

Exhibit 5.1: Slots Inspector & Attendee Details

Figure 3.1: Filterable slot management showing attendee contact information, venue mode, and confirmation status.

Exhibit 5.2: UI Refinements (Dynamic Greeting, Notification Badge, Available Slots)

Dynamic Admin Greeting
Displays logged-in administrator name ('Sudhin' / 'GENTIZE MD').

Smart Notification Badge
Displays count only on new events; auto-resets upon viewing.

Available Slot ('AS')
Standardized orange 'AS' badge.

Summary of Engineering Upgrades Completed Today:

- **Color & Contrast Compliance:** Strictly enforced pure white text/icons on vibrant orange containers across all 8 views.
- **Card Backgrounds:** Replaced muddy light orange appointment cards with clean white (`bg-white`) and subtle slate borders.
- **Slot Indicator:** Upgraded available slot markers to the clear, branded 'AS' orange badge.
- **Notification Engine:** Implemented reactive count badges for both Client and Admin with automatic read-reset.
- **Data & Location Fixes:** Solved location truncation (`veeralur Locality`) and date `undefined` display bugs.
- **Admin Personalization:** Integrated dynamic time greetings and administrator display name support.
