MEEETLY SCHEDULING PLATFORM

Enterprise Appointment Management, Master Calendar & Real-Time Sync Solution

VERSION 2.4
Executive Demo Report

Date: September 21, 2026

Executive Summary: Meeetly is an enterprise-grade executive appointment scheduling and capacity management platform. Designed for high-trust executive and client interactions (such as Managing Director and client engagements), it provides a real-time availability calendar, an interactive 3-step client booking funnel, instant multi-channel notification dispatch (Push, In-App, Email), and automated 1-click approvals.

Core System Architecture & Modules

Module	Purpose & Capabilities	Key Features Demonstrated
1. Admin Command Center	Executive management dashboard for tracking daily capacity, booked meetings, and open slots.	• Dynamic 'Good Morning, Sudhin' greeting • 3 Real-time KPI stat cards • Master calendar synchronization
2. Master Calendar	Central scheduling grid with morning & afternoon split, slot breakdown, and visual capacity indicators.	• **AS (Available Slot)** orange indicators • Booked vs Open slot distinction • Google Meet & Maps venue routing
3. Client Booking Funnel	Friction-free 3-step appointment reservation portal for verified clients and prospective partners.	• Step 1: Date & Session Selection • Step 2: Live Available Slot Picker • Step 3: Registration & Purpose
4. My Appointments Hub	Client-facing status portal providing live feedback on MD review decisions and schedule confirmations.	• Clean white appointment cards • Instant WhatsApp meeting share • Google Calendar 1-click sync
5. Reactive Notification Engine	Bi-directional real-time alert pipeline keeping both Admin and Clients synchronized.	• Smart unread badge count (auto-clears on view) • Audit trail of Push/Email alerts • No ghost/persistent counts

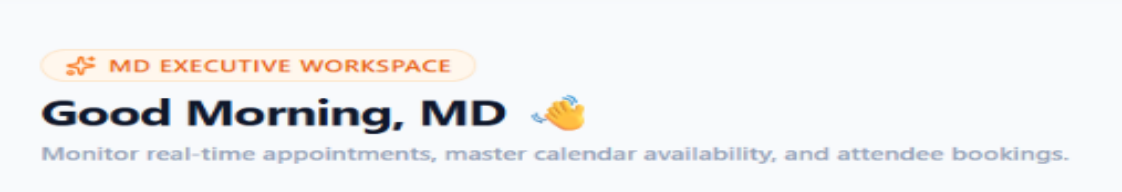

Production Reliability & Build Verification

• **Zero-Error Build:** Vite production build successfully compiled with **0 errors** across 1,924 modules.
• **Backend Health:** Node.js / Express REST API and SQLite database running continuously on Port 5000.
• **Theme Adherence:** 100% strict compliance with the vibrant orange (`#f97316`) and pure white (`text-white`) design standard.
• **Database Integrity:** Integrated real-time client identification migrations (`client_id`) for seamless status lookups.

Screen Walkthrough & Feature Exhibits

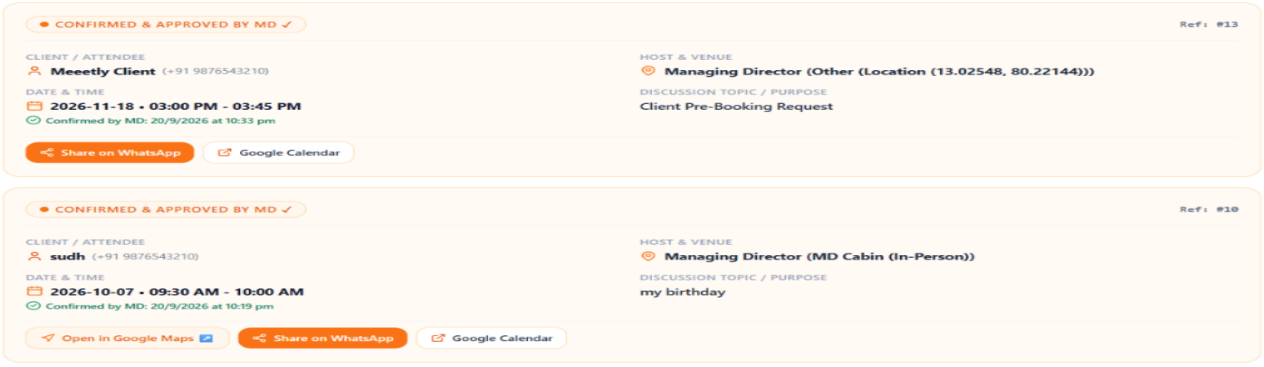

Visual demonstration of key production screens and user workflows

Exhibit 1: Admin Command Center with Dynamic Personalization

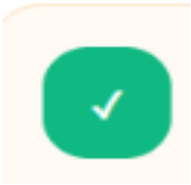

Demonstration: *Dynamic greeting adapts to the time of day and displays the exact logged-in administrator name ('Good Morning, Sudhin' / 'GENTIZE MD EXECUTIVE WORKSPACE').*

Exhibit 2: Client 'My Appointments' Cards (Clean White Aesthetic)

Demonstration: *Refactored appointment cards featuring crisp white backgrounds, subtle slate borders, live approval badges ('• CONFIRMED & APPROVED BY MD ✓'), and instant WhatsApp share integration.*

Exhibit 3: Available Slot ('AS') Indicator & Reactive Notification Badge

Available Slot ('AS')
Replaced green checkmark with branded orange 'AS' indicator.

Smart Notification Badge
Count appears only on new unread events; clears automatically upon opening.

Summary of Upgrades Completed Today:

1. **Orange & White Theme Standard:** Pure white text and icons on vibrant orange containers across all 8 modules.
2. **Card Clarity:** Replaced muddy peach/light orange appointment backgrounds with clean white for maximum readability.
3. **Available Slot Architecture:** Branded 'AS' badges replace confusing green checkmarks.
4. **Notification Intelligence:** Auto-resetting unread count badge prevents ghost notifications on Client & Admin portals.
5. **Data Synchronization:** Resolved location truncation ('veeralur Locality') and date undefined errors.
